

FURNITURE FACADE SYSTEM ALLEANZA

The ALLEANZA facade system enables to manufacture kitchen and room furniture of european quality and design in the medium price segment.

Alleanza furniture facade systems includes:

- ▶ Facades
- ▶ Accessories
- ▶ Worktops and furniture components

Construction

- ▶ Construction of facades is of assembled type, and it includes an insertion based on MDF board coated with different materials and a frame (vertical and transversal bars made of facade profile of different configurations).
- ▶ For door, a profile combined with flat or shaped panel is used.
- ▶ For window, a profile with insertions of glass, stained-glass, rattan, and other materials is used
- ▶ For construction with drawers, frame profile is combined with a flat panel. Depending on width of profile and method of mating, a construction can include from one to five elements

Materials for facing

- ▶ Eco Wood Veneer
- ▶ finish film with decors "Patina"

Types of facades

- Three types of facades of different saw cut and mating of elements are presented in the collection:
- ▶ facades with counter-profile under an angle of 90°;

- ▶ French cut
- Both facades are included in the STANDARD PROGRAM, and they ensure high quality of mating for the frame profile parts to exclude ingress of moisture and to provide longer service life of items;
- ▶ facades under an angle of 45° are delivered by CUSTOMIZED PROGRAM only, and they involve a classical type of mating which ensures reliable fastening of all elements of the facade.

Benefits

- ▶ optimal price
- ▶ high performance of facades;
- ▶ environmental friendliness of facing materials;
- ▶ beauty and expression of decors;
- ▶ exclusive products;
- ▶ saving of time and cost due to complete deliveries "from a single source".

Following accessories are used for finishing of the furniture facades: rods, bases, lighting planks, decorative corners, and finishing panels. It is these parts which enable to create expressive and elegant facade.

The facades are manufactured at the unique production system of KOCH company (Germany) commissioned in 2013. This production system has been developed by German specialists by order of Soyuz IG and has no analogs in Russia now.

ALLEANZA'S NEW DEVELOPMENTS

The "Soyuz" industrial group has opened up production of new models of lacquered aeruginous frame facades Alleanza and presents three new products of gold, silver and nut shades for the most demanding clients: "Elizabeth", "Ornella", "Christine".

In addition, four exclusive decors have been developed: "Acacia", "Linen", "Grey pearl", "Pistachio".

The collection has been also replenished by two series of facades: "Sole" and "Scale" made in all decors of standard program.

Due to product expansion, the Furniture Facade System ALLEANZA offers to furniture makers more successful solutions to design furniture both in modern and in classical styles.
